

Institutional Supply Items Guide

A practical, quote-ready list for school clinics, campus first-aid zones, events, and institutional health supply planning.

Use this guide to start a conversation, prepare an RFQ, compare current buying, or build a replenishment plan. Medicines and emergency items remain subject to the applicable regulatory pathway, licensed healthcare supervision, storage requirements, and school medical protocols.

What a Controlled Supply Program Covers

An institution does not only need items. It needs a dependable way to know what is required, available, missing, expiring, serviced, and documented.

01

One approved item basket for clinic, first-aid zones, emergency support, and campus events.

02

One replenishment rhythm for monthly, termly, annual, and event-triggered needs.

03

One readiness file for delivery notes, expiry registers, equipment status, and actions

01 Receive RFQ, clinic list, or invoices

02 Map items by institutional supply category

03 Quote direct and partner - supplied lines

04 Deliver with batch, expiry, and documents

05 Maintain refill and readiness cycle

INSTITUTIONAL SUPPLY CATEGORIES

Core Clinic and Campus Items

- Temperature logs
- First aid kit checklist
- Stock count sheet
- Delivery note file
- Approved item master
- Fixed price book
- Maintenance log
- Expired stock form
- Readiness report
- Reorder request form

NEXT STEP

Turn the List Into a Quote

To prepare a clean quotation, PSC needs the school name, campus size, current item list or RFQ, required quantities, preferred brands where any exist, and whether items are for the clinic, sports, buses, labs, trips, or general campus use.

Input	Why it matters
Current RFQ or clinic list	Allows line-by-line pricing, brand matching, and equivalent suggestions.
Student count and campus zones	Helps size replenishment packs and first-aid kit coverage.
Existing invoices	Shows overpaying, supplier fragmentation, and urgent purchase leakage.
Expiry or low-stock list	Creates a quick corrective supply opportunity before term starts.
Required delivery deadline	Separates in-stock lines from partner-supplied or longer lead-time items.
